## **New Horizons in Understanding Biology and Treatment Options in Metastatic Breast Cancer**

March 6-7, 2020, Vienna, Austria

Venue: NH Hotel Vienna Airport

Chair: Univ. Prof Dr. Rupert Bartsch

Univ. Prof Dr. Christoph Zielinski

## Agenda:

### Friday March 7<sup>th</sup>

#### **A. Joint Session I: Welcome and Introduction**

1. Welcome
2. Highlights of the year
3. Optimizing the Design of Breast Cancer Trials

#### **B. Understanding Breast Cancer Biology**

1. Molecular Regulation Mechanisms in Breast Cancer – an Overview
  - a. Mechanisms of Treatment Resistance: Molecular Pathways
  - b. The role of gene expression profiles in breast cancer prognosis and prediction
  - c. BRCA, HRD and PARPi: Therapies for TNBC

2. Immune Mechanisms in Breast Cancer

#### **C. Standards and challenges in early-stage breast cancer**

1. (Neo) adjuvant therapy in high-risk breast cancer subtypes
2. Adjuvant endocrine therapy: What and How long
3. The Surgeon's Perspective: Challenges for local treatment in the age of neoadjuvant therapy
4. An Update on Radiotherapy
5. Panel: Q&A

### Saturday March 7

#### **D. Metastatic Breast Cancers**

1. Personalized Therapy in Metastatic breast cancer: When and What?
2. Treating Metastatic HER2-positive disease
3. Current and Future Role of CDKi

#### **E. Break-Out Sessions: Meet the Professors**

#### **F. Joint Session II: Side Effects of Modern Therapeutics**

1. Management of CDKi Side Effects
2. Detection and Management of Side Effects of IO
3. Quality-of-Life in MBC patients
4. Panel: Q&A

#### **G. Joint Session III: Closure and Summary**

#### **Breakout sessions for Nursed and Patient Advocacy**

Management of side effects of CDK4/6 inhibitors

Fatigue /Fear / Pain Management / Rehabilitation /Communication /Drug access / CINV

Introducing palliative care in the treatment continuum of metastatic breast cancer patients

Introducing in Oncology Nursing in Central Europe
